**Dear Customer,**

We're proud of our progress in 2016 in both drinking water supply and wastewater services.

Our new wells on the East side of the Kennebec River provide a new, redundant source of safe water. And we completed a four-year combined sewer overflows (CSO) project ahead of the schedule required by the Maine DEP.

We also switched to monthly billing for most customers, which makes budgeting easier and helps detect leaks sooner. We look forward to serving you in the new year, and thank you for being a GAUD customer!

**—The GAUD Team**

## **TIME TO PROTECT YOUR OUTSIDE FAUCETS**

Cold weather is here, so make sure your pipes aren't vulnerable to freezing and bursting. The first things to do: close basement vents and insulate exposed outdoor faucets. Here's a complete guide to keeping pipes from freezing: [crwater.com/prevent-frozen-pipes/](http://crwater.com/prevent-frozen-pipes/)
